Prepare your actual test with our sure pass exam guide for successful result

**Exam** : **VCS-257**

**Title** : Administration of Veritas  
InfoScale Storage 7.1 for  
UNIX/Linux

**Vendor** : Veritas

**Version** : DEMO

**NO.1** An administrator receives notification that the vxconfidd daemon has stopped on a Veritas InfoScale Storage production server that has been running applications on mounted Veritas file systems.

What is the impact of this failure?

- A. application I/O fails; all Veritas file systems are disabled
- B. application I/O fails; all imported disk groups are disabled
- C. application I/O continues; I/O performance to disk is degraded
- D. application I/O continues; VxVM configuration changes fail

**Answer:** D

**NO.2** What are two benefits of multi-volume file systems (MVFS)? (Select two.)

- A. file system metadata can be placed on a separate volume
- B. physical to virtual migration is enabled
- C. data failover to secondary volumes is provided
- D. a single file system can be created over more than one volume
- E. multiple file systems can share storage from an MVFS volume

**Answer:** A,D

**NO.3** An administrator sets up site awareness on a host and needs to verify that everything is configured correctly.

Which command should the administrator execute to simulate the failure of a site to verify the configuration?

- A. vxdiskadm
- B. vxfiredrill
- C. vxdg detachesite
- D. vxdg split

**Answer:** C

**NO.4** When write-back caching is enabled on Cluster File System (CFS), SmartIO mirrors the write-back data at the file system level to the other node's cache.

What is this behavior called?

- A. cache mirroring
- B. cache reflection
- C. cache duplication
- D. cache redundancy

**Answer:** B

**NO.5** Which daemon provides the interface between Veritas Volume Manager commands and the kernel device drivers?

- A. vxiod
- B. vxconfigd
- C. vxrelocd
- D. vxvold

**Answer:** B

**NO.6** An administrator uses the command shown below to create a RAID-5 volume volraid together with two RAID-5 logs in the disk group mydg:

```
vxassist -b -g mydg make volraid 10g layout=raid5 nlog=2
```

What is the default number of stripe columns for the volraid volume?

- A. 2
- B. 3
- C. 4
- D. 5

**Answer:** B

**NO.7** Which option should the administrator use with the vxsnap command to resynchronize a full-sized, space-optimized or linked break-off snapshot with the original volume?

- A. refresh
- B. reattach
- C. restore
- D. prepare

**Answer:** D

**NO.8** Which Veritas Volume Manager daemon uses the Storage Networking Industry Association (SNIA) HBA API library to receive SAN fabric events from the HBA?

- A. vxesd
- B. vxiod
- C. vxconfigd
- D. vxrelocd

**Answer:** A
